Subject: Caroline: - - Am half way through your paper and am impressed.

To: zeusrdx@yahoo.com

Caroline,

Am half way through your paper and am impressed.

Yes, Scalar PHI waves at each reception point would give us Huygens idea and the reason for many things including refraction.

I now see why Gabriel was impressed with you.

Very good Caroline.

BUT the BEST is your seeing that there is NO force with in phase waves and there IS FORCE with out of phase waves.

WHAT DATE DID YOU FIRST PUBLISH THIS?

I'm hoping that I may have beat you on this but I may not have.

I'll put a link for your paper on my web site after I get finished reading it.

My website gets about a million hits a year. Maybe more people will now listen to you.

Z
